Mr. William J. Casey, Director
Central Intelligence Agency
Washington, D. C. 20505

INDIA REGISTRY
FILE: 45-1

Dear Director Casey:

Kodak would like to invite you to see a demonstration of our video equipment and related accessories including night vision video capabilities on March 12 and 13. The demonstration will take place at our new Kodak facilities at 1300 N. 17th St., 17th floor, Seminar Room, in Arlington, VA from 9 AM-12 PM and 1-5 PM on Wednesday and 9 AM-12 PM and 1-3 PM on Thursday.

The increased interest on capturing and storing images for various law enforcement and security needs have brought several companies with new technology and methods to the marketplace.

In the past two years Kodak has entered the electronic arena with the introduction of an 8mm video system. In the last two months Kodak has introduced its second generation 8mm system. Due to its compact size, 4-1/2 lbs. and 10 LUX light level, it has generated a wide range of interest from surveillance, crime scene, accident, training, and public relations uses. The quality of a 8mm tape has been compared to be as good as 1/2" and we fully expect to see this format size acceptance increase as other manufacturers enter the market.

We also will demonstrate our new Still Video System that allows you to display high-quality still video images on any conventional monitor or television receiver. With the remote control device, the user, is capable of randomly retrieving any one of the 50 pictures or you can also automatically sequence the pictures for an unattended presentation. We have been showing this recorder/player at national exhibits and the response has been overwhelming, but this will be our first showing in Washington. Many have said this product will replace today's slide projectors.

If you cannot make these times, feel free to ask someone else from your department to stop by. If due to your schedules no one can attend and you would like to see the equipment at another time, please let me know. We are interested in helping you meet your short term and long term needs in imaging. Please let us hear from you.

Sincerely,

Lee W. Schilling
Manager
